DYXnet Group Wins at the IAIR Awards 2016 as Excellence of the Year for Innovation for ICT Service Provider in Greater China

14/03/2016 14:35

Greater China's Carrier-neutral Network Service Provider Brings Global Corporate Excellences with Endless Effort

HONG KONG, March 14, 2016 /PRNewswire/ -- DYXnet Group, Greater China's leading carrier-neutral network service provider, is pleased to announce today that it has won this year's International Alternative Investment Review (IAIR) Awards 2016 as Excellence of the Year for Innovation for ICT Service Provider in Greater China. IAIR Awards is the global award that recognized excellences in global economy and sustainability. Jeremy Cheng, General Manager of HK Sales for DYXnet Group, represented the Company in attendance at the award presentation ceremony and gala dinner held on March 11, 2016 at the Sheraton Hotel & Towers in Hong Kong and celebrated the joyful moment with other awardees.

Lap Man, Founder & CEO of DYXnet Group, remarked: "I am thrilled to obtain IAIR Awards 2016 as this is the first award that our Group has obtained after DYXnet and our parent company 21Vianet's Content Centric Internet Backbone (CCIB) units have been merged early this year. I really want to thank those readers from publications IAIR and IAIREVIEW.org who cast a vote for us via the online survey. This is really a big encouragement to motivate the whole Group to continue providing best-of-the-breed services for our enterprise clients. Over the past 16 years, we put lots of resources into investing our people, rejuvenating our offices, enhancing our network infrastructure as well as upgrading our customer services level. We believe happy staff with excellent Group backup in diverse areas is crucial to continue to provide tailor made and sustainable service portfolios and extraordinary customer services to our clients that bring great values to them and win the market."

IAIR Group is a research institute and a global independent publishing house headquartered in Milan with more than 10 years of experience in the publishing field. IAIR Awards is constantly in pursuit of excellence in all places, whether small or large, national or international companies, as well as companies operating in niche areas. As far as the methodology of IAIR Awards is concerned, IAIR - Excellence in Global Economy and Sustainability, a quarterly global magazine will conduct an annual online survey which provides a qualitative and quantitative review of the best firms. The firms are evaluated in the areas of global finance and

global economy with a focus on sustainability, by region and by areas of services, through its 50,000+ readers to provide to its judging panel which is composed of the editorial staff of IAIR and International Family Office Magazine to make the selection of the final award winners. The main part of the evaluation, therefore, is obtained from the online survey and its readers' votes. The selection criteria will be based on sustainability, business results, leadership in company's field, green initiatives, strategic development, high quality of service, innovation in company's field and education of each participating company.

Established in 1999, DYXnet Group is Greater China's leading ICT service provider offering Multiprotocol Label Switching Virtual Private Network (MPLS VPN), internet access, data centre, unified communication and network security solutions to enterprise clients with provisioning capability in many cities in Greater China and the wider Asia Pacific region. In August 2014, our Virtual Private Network (VPN) business unit was acquired by 21Vianet Group, Inc. (NASDAQ: VNET) ("21Vianet"), China's largest carrier-neutral internet data center services provider. Starting from 2016, DYXnet and 21Vianet's Content Centric Internet Backbone (CCIB) units have been merged. The Company is now repositioned itself as the leading carrier-neutral network service provider in Greater China covering both virtual private network and public network services.

DYXnet serves 700 cities in Mainland China, Hong Kong, Taiwan, Singapore and Vietnam, including more than 10,000 MPLS VPN clients' sites, and hosts more than 8,600 clients' servers. It was the first batch ICT service providers in Greater China to obtain ISO 9001:2008; ISO/IEC 20000:2011; ISO/IEC 27001:2013 international certifications for information security, international IT service management as well as quality control respectively. These qualifications demonstrate DYXnet's commitment to offering premium information and communication technology with outstanding customer service.
